PREFACE

Heritage is a priceless possession. The lives and decisions of pioneer ancestors who helped develop this country have influenced and marked the paths of each descendant more than can ever be realized.

The primary purpose of this genealogical record is to preserve the present available information concerning the descendants of John and Rebecca (Whittaker) Gregg. See SECTION I.

The incentive for attempting this research was supplied by a cousin, Floyd Harvey Hanson, of East Detroit, Michigan. In 1973 he compiled a directory tracing the descendants of James Harvey and Sidna (Gregg) Hanson. * John and Sidna were children of Reuben and Phebe (Harpole) Gregg. An effort has been made by both researchers to collect data concerning Reuben and Phebe and their other descendants. The information is included in SECTION II of this directory.

Some of the records have not been verified but offer a starting point for further research. The compiler has visited the PAINT TOWNSHIP CEMETERY, London, Ohio, where early information is recorded. See map, page 21.

The compiler appreciates the helpful assistance given by so many and thanks all who have helped to bring this directory to its present state of completion.

This Genealogical Record is dedicated
to the memory of my father

RECORD OF DESCENDANTS

Three of the four children of John and Rebecca (Whittaker) Gregg grew to adulthood and left descendants. Each line of descent is given a code letter. The respective lines of descent are indicated thus:

- A Descendants of Washington Erwin Gregg
- B Descendants of Agnes (Gregg) Doty
- C Descendants of Addison Byron Gregg

The descendants are listed by generations: I FIRST GENERATION, II SECOND GENERATION etc. Each descendant has a code number (order of birth among siblings). A guiding notation indicates where to find data concerning the children. Example: See III-A2, page 7. This means that information about the III THIRD GENERATION, children of the second child of A, will be found on page 7. The parents names are indicated at the head of the section in which their children are listed.

The same symbols are used to indicate the descendants of AMOS GREGG except an X precedes the code letter of each descendant. For the descendants of ADDISON HARPOLE GREGG, a Y precedes the codenumber of each name.

 c. n.d.

Edward's mother died at his birth and he was raised by friends, Jacob and Christiana Blaughter who had six children of their own.

REBECCA WHITTAKER GREGG was a school teacher before her marriage and wrote the following:

THE SCHOOL TEACHER'S FAITH

Here am I chosen by the Creator to look after the little flock He has placed in my care.

Young minds that I must teach more clearly to understand; Young hearts that I must guide to the ways of kindness and sympathy.

How can I impress them with my thought of them that they can find life beautiful every day through it all if they will be gentle, kind and helpful to others.

More and more it comes to me that I can convince them that Love is all, if loveliness is in my own life.

And with this faith as my inspiration I shall try to be worthy of the Creator's Trust.

Copy of a letter written by Addison Byron Gregg to his sister, Agnes Gregg Doty. Original becoming very dim.

Syracuse, Nebraska
May 30, 1893

Dear Sister,

I arrived here the 28th and found Uncle Edd's (Whittaker) family well. I visited at Uncle John's (Whittaker) near Olathe (Kansas) two days last week. Mother's picture (Rebecca Whittaker Gregg) is quite good, I think. We are talking of having it photographed. Will write again when ready to start to Chicago. Am well and having a good time. We are going to Nebraska City today to attend Memorial services. It is very dry here. Have had no rain of any consequence this spring. Wheat, what little has not been plowed under will not make anything. Have seen no country where crops in general look as well as in Crawford County. We are getting ready to start will close in haste, with love to all.

THE HISTORY OF THE
CITY OF BOSTON
FROM 1630 TO 1800

The city of Boston, founded in 1630, has a rich and varied history. It was the first permanent English settlement in New England, and its growth was rapid. By 1700, it was one of the largest and most important cities in the colonies. Its location on a peninsula made it a natural harbor, and its strategic position made it a key point of defense. The city's history is marked by significant events, including the Boston Tea Party, the Battle of Bunker Hill, and the American Revolution. The city's architecture, with its many historic buildings, is a testament to its long and storied past.

CHAPTER 1
Introduction to the Study of Language

Language is a system of arbitrary symbols which are used to represent objects and ideas. It is a social phenomenon, and its use is governed by social conventions. The study of language is a branch of linguistics, which is the scientific study of language. Linguistics is a multidisciplinary field, drawing on insights from psychology, sociology, and anthropology. The study of language is important because it helps us to understand how we communicate and how our language shapes our thought.

There are many different languages in the world, and they all have their own unique features. Some languages are spoken, while others are written. Some languages are used in everyday life, while others are used in formal contexts. The study of language is a complex task, and it requires a deep understanding of the human mind and society. Linguists use a variety of methods to study language, including observation, experimentation, and analysis of language data.

One of the most important aspects of language is its structure. The structure of a language determines how its words are combined to form sentences. There are many different ways to structure a language, and each language has its own unique structure. The study of language structure is a key part of linguistics, and it helps us to understand how language works. Linguists study the structure of language at different levels, from the individual word to the entire sentence.

CHAPTER 2
The Structure of Language

The structure of a language is determined by its grammar. Grammar is the set of rules that govern the structure of sentences in a language. It includes rules for word order, inflection, and syntax. The study of grammar is a key part of linguistics, and it helps us to understand how language is structured. Linguists study grammar at different levels, from the individual word to the entire sentence.

SECTION II

THE GREGG FAMILY BACKGROUND

Reuben Gregg is the earliest ancestor definitely named and located. He moved with his parents from Virginia to Madison County, Ohio about 1810. Phebe Harpole was the daughter of Michael Harpole who brought his family to Madison County, Ohio before 1816. A marriage license certificate in the London, Ohio office of the Madison County Probate Judge confirms the marriage of Reuben Gregg and Phebe Harpole on 30 January 1816. The following information is available through the help of interested descendants.

"The History of Madison County Ohio 1883" lists a Thomas Gragg, second son of Reuben and Phebe Gregg who married Hannah E. Waggoner. Family lore has reported that Amos' wife objected to the Gregg spelling and it is thought that Amos T. Gregg and Thomas Gragg are one and the same person.
